Simply fascinating.

Lindner – facades for projects
that capture the attention.

Discover the many Lindner benefits:

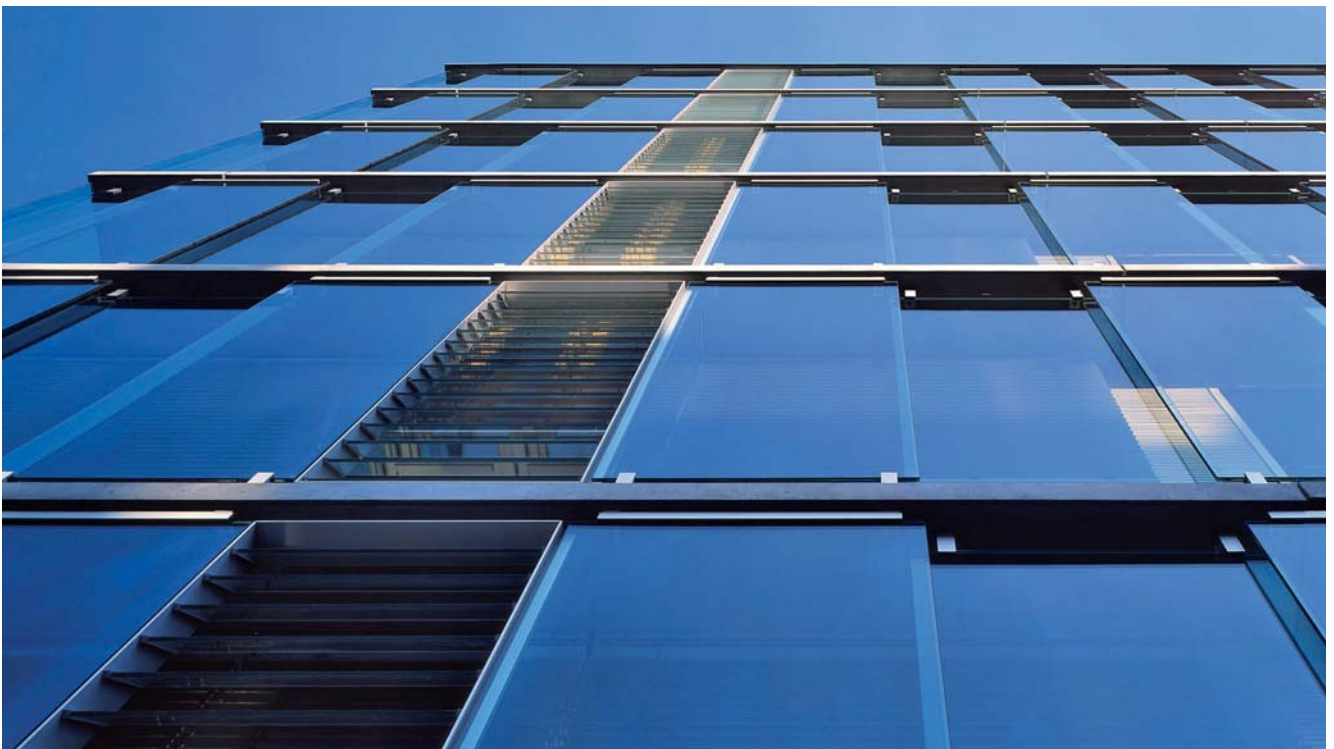

- Unique system solutions or bespoke designs
- A professional consultancy service
- Outstanding performance from high quality products
- Total support at every stage of your project, from design to installation
- Extensive in-house production capabilities
- A wealth of industry experience

Lindner, your perfect partner for inspirational facades.

Whatever your needs Lindner provides professional support at every stage.

The perfect building facade should be more than just a shell. It should encompass different technologies and materials to create an intelligent solution that offers both an aesthetically pleasing appearance and outstanding performance. The Lindner Facade Group can provide the products, expertise and support that will transform even the most exacting design concept into reality.

By adopting a partnership approach to each customer Lindner delivers the planning, manufacture and installation expertise necessary to create the perfect solution to each project whether steel, aluminium, glass or other materials – and will identify the most appropriate one before tailoring it to meet the specific needs of the project. With manufacture at Lindner's plant in Arnstorf, Germany, the quality of the finished facade is guaranteed.

University of Applied Sciences, Frankfurt am Main

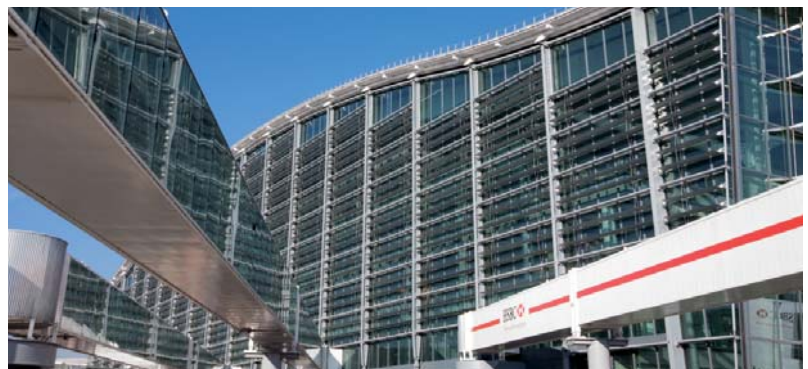

City Hall, London

Lindner: facades that get noticed – from the facade specialist.

Lindner's innovative approach and specialist expertise create facades that attract attention.

Since 2006 Lindner has had additional expertise at its disposal in the form of the British facade specialist Schmidlin (UK) Ltd. Over the past 25 years this company has established many new benchmarks in facade construction. It has made significant contributions to numerous prestigious projects around the globe and acquired a wealth of specialist skills and knowledge in the process – skills and knowledge that are now available to Lindner's customers.

Terminal 5, Heathrow Airport, London

| From imagination to reality.

With Lindner as your partner you'll benefit from its extensive capabilities.

Lindner supports its customers at every stage of a project – from design to installation – with co-ordinated processes, made-to-measure solutions, a single source of responsibility and a rapid response capability.

Challenging projects demand a practical and imaginative approach. Lindner draws on its extensive design and engineering services to create an effective and individual solution to every stage of a project, right from the earliest design phase through to final installation and beyond.

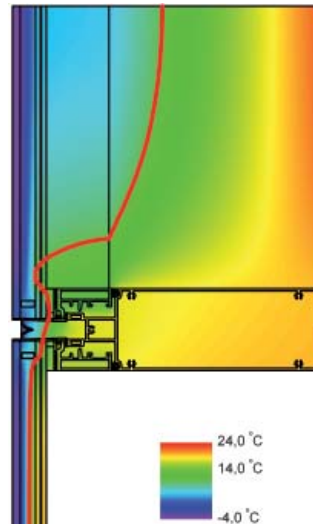

It also simplifies the process by providing customers with a single source of responsibility that gives instant access to its network of offices in places such as Arnstorf, Berlin, London, Shanghai and Arlesheim in Switzerland. From these locations the Company's highly-qualified design and installation staff can provide the type of outstanding technical support that has already benefitted a wide range of projects across Europe, Asia and the Middle East.

Rotunda, Birmingham

Practical, safe and aesthetically pleasing.

Thanks to its extensive testing capabilities Lindner can guarantee that each of its outstanding designs will satisfy the most exacting structural, weather, acoustic and fire protection requirements. The company supplements its own TÜV-certified in-house testing laboratory by calling on specialist external testing institutes and this enables it to satisfy individual requests rapidly and reliably – the hallmark of an industry leader that really is „Building New Solutions“

Energy testing of a facade system by means of isotherm calculations

Set your inspiration free.

Lindner Facades:

- Designs tailored to your specific requirements
- Able to satisfy the most exacting design engineering and appearance requirements
- Technically innovative
- Cost-effective

Dynamic load testing for the Rotunda project in Birmingham

Lindner facades are manufactured in our plant in Arnstorf.

For exceptional results you need an exceptional partner.

Lindner's advanced manufacturing plant in Arnstorf, Germany ensures that all its system solutions and tailor-made facades are created to the highest possible standards in the shortest possible time. Its global procurement department works closely with carefully-chosen partner companies to source the highest quality components. For a Lindner customer that means exceptional solutions at competitive prices that offer outstanding performance no matter how large or unusual their project may be.

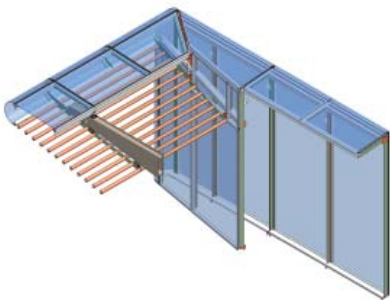

Final assembly of facade elements

Achieving goals by exceeding your expectations.

Lindner – quality at every stage.

At Lindner, quality is paramount. The Company's EN ISO 9001-certified quality management system means that regular control and improvement processes are used to maintain and improve standards. Lindner's professional approach to project planning also ensures that every stage of the process is carefully controlled - from contract award to completion. The result is an impressive and attractive facade each and every time.

Use of 3D planning with complex facade design

Police station, Barnim

Lindner – first-class facades,
seamless delivery and
professional assembly.

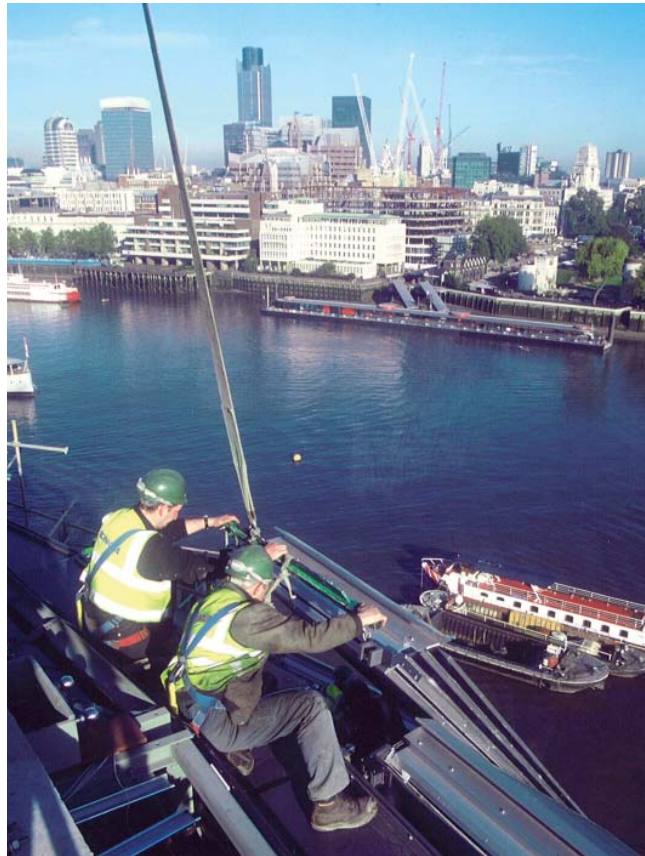

Rotunda, Birmingham

The highest standards of installation.

Lindner places great emphasis on combining high quality products with effective installation procedures. With this in mind, the Company's fully qualified and experienced staff are able to handle any project, no matter how large, providing dedicated support at short notice.

Expertise for your facade project.

- Highly-qualified professional staff both on and off-site
- Your own personal contact on-site
- A well-established global network of resources and support
- A wide variety of special-purpose equipment
- Adherence to exacting safety standards

Installation of a facade element

Lindner service: The key to successful building management.

Lindner's expertise extends beyond merely creating impressive facades to include a professional maintenance service. Lindner's experienced specialists can handle all your inspection, replacement and refurbishment requirements, whether for a single building facade or for your entire commercial building and infrastructure portfolio.

Outstanding in every respect.

Lindner's integrated management system ensures operational efficiency without compromising safety and environmental concerns.

Responsibility towards the environment:
we set great store by recycling.

A cleaner environment.

Acting in an environmentally aware manner is essential if an organisation such as Lindner is to achieve lasting success, and for this reason the Company uses ecologically tested and acceptable materials wherever possible. It also operates in accordance with an accredited environmental management programme that aims to reduce both environmental emissions and energy consumption. All developments are planned as precisely as possible in order to reduce any environmental impact to an absolute minimum.

Safety – the top priority.

Because Lindner acknowledges its safety responsibility towards both its employees and its customers it pays great attention to the occupational health and safety of all those involved. Its safety management ensures that maximum protection is provided against accidents and other health risks, both in the Company's own facilities and on site.

We are a founder member of the German Sustainable Building Council (DGNB).

Lindner's quality management system includes EN ISO 9001, EN ISO 14001 and OHSAS 18001 certification. The development of this system is also continued in order to deal with the specific requirements of the Company itself and its customers.

We can do it all for you.
