Ceilings / Finishes

General Description

- Real wood veneer finish
- Applied to a metal ceiling panel (aluminum or galvanized steel)
- Preserves all advantages of a metal panel
- Furnishes the look of a solid wood panel
- Many exotic veneers from around the world can be utilized
- Unperforated or perforated

Design Considerations

- Pureline real wood finish is based on natural wood. Therefore it is subject to external influences. Wood also has distinct material characteristics, displaying numerous structures and colors, which should be taken into consideration
- For perforation options see our Technical Guide
- Available with perforated surface and acoustical fleece and/or encapsulated mineral wool applied to the back side of the panel to improve acoustics
- To maintain the character of wood as completely as possible, we recommend our Picatto perforation, such as L 0,7.1
- For indoor use only

Technical Data

Surface Burning	Tested in accordance with ASTM E 84 (Class A)
Cleaning	Soiled surfaces can be moistly wiped with non-abrasive and mild alkaline detergents as recommended by the manufacturer

Subject to change without notice. This document is intellectual property of Amstorf based Lindner-Holding KGaA. It may neither be duplicated, exploited for profit, distributed for business purposes nor shown to any third parties without our approval. Please note that all details, schemes, pictures and dimensions shown in this catalogue are without commitment and might vary due to final project requirements. Especially all figures shown in inch are rough dimensions only. Our O&M manuals, Installation Recommendations, Product Data Sheets, etc. and the installation of Lindner products are exclusively foreseen for persons with special metal ceiling knowledge. For safety reasons all others are not allowed to use Lindner's products. Lindner ceilings must be installed as a complete system. Missing, wrong or by other products substituted components, additional loads by services for e.g. luminaries and anchors not approved by Lindner can cause failure of the complete ceiling system. Lindner ceilings are high-quality products for the interior only. All in our documents mentioned performances are subject to correct installation according to our company's manuals and Standard Terms and Conditions.
